PRESS RELEASE

GE Capital Aviation Services and AerData to establish an industry-standard records platform with STREAM

Amsterdam, The Netherlands; July 26th 2012 – AerData B.V., the provider of software and services for the aviation industry announces the signing of a 5 year agreement with GE Capital Aviation Services (GECAS), one of the leading aircraft and engine lessors, for STREAM Digital Aircraft Records software. STREAM is used by airlines, lessors and MROs to manage scanned aircraft and engine records.

Commenting on the announcement, Mark Nieuwendijk, Managing Director of AerData said: "Combining the capabilities of STREAM with the GECAS fleet will result in significant cost savings for GECAS and its customers by creating efficiencies in the aircraft and engine transition process, and help protect the value of the aircraft and engines."

Gerry Kenneally, SVP and Manager Technical Operations of GECAS said, "GECAS wanted to modernize the current records process of transitioning aircraft between lessees. Our goal was to establish a method whereby our staff, contractors, customers and regulators could work together via a hosted system in order to upload, manage and share critical records at a transition. Less downtime and less costs in transitions is our goal. AerData's product, leasing experience and IT infrastructure matched our requirements."

About AerData B.V.

AerData provides lease management software, engine fleet planning software, records scanning software, technical and backoffice services for aircraft and engine operators, lessors and MROs. With a strong customer focus AerData delivers a reliable and secure service to its clients using latest technologies and state of the art infrastructure.
