

PRESS RELEASE
FOR IMMEDIATE RELEASE

Cargolux chooses AerData's STREAM digital aircraft records software

Photo credit: John Fleck

Amsterdam, The Netherlands; 3rd December 2013 – AerData, the provider of software and services for the aviation industry announces Cargolux Airlines International S.A., Europe's leading all-cargo airline, as the latest Airline to acquire STREAM aircraft records software.

STREAM (Secure Technical Records for Electronic Asset Management) is the industry's foremost web-based solution used by some of the world's largest airlines, lessors and MROs to manage aircraft and engine records.

Commenting on the announcement, Mark Nieuwendijk, Managing Director of AerData said; "AerData have been providing services to Cargolux for almost 6 years, supporting them with records management services for aircraft returns. I'm glad to announce that they will now take on STREAM to support their own fleet as well as their third-party maintenance business. STREAM is now supporting both large and small regional, international and cargo airlines across the world."

Onno Pietersma, VP Maintenance & Engineering, Cargolux Airlines said the airline had strict requirements in the selection process to ensure its business objectives could be realized; "We are pleased to be making this announcement with AerData, a company with an impressive client list from across the industry. It's evident that STREAM is becoming a market standard and we wish to realize the benefits it will bring to Cargolux as we continue to improve our efficiency."

About AerData
