AMS/RMS Insights
Multiple products, one integrated Business Intelligence (BI) tool

AMS/RMS Insights is the integrated Business Intelligence solution for the Asset Management Solution and the Records Management Solution designed to improve business processes by integrating data, enabling self-service analytics in an integrated solution.

This cloud-native and single-point solution closes the gap between data, insights and actions.

Fully managed pre-defined BI model

Data visualizations & KPI's

Ability to check data quality

Self-service analysis capability

Data collaboration on any device & alerting

No need for IT support

AMS/RMS Insights provides AMS and RMS customers with a Business Intelligence tool that enhances decision making by visualizing key business drivers stored in raw data.

Capabilities

- Actionable insights from your data stored in AMS/RMS help you manage the business
- Fully managed data models, off-the-shelf integration with AMS/RMS
- Data visualizations and KPI's with alerting
- Self Service Analytics capability allows you to define your own dashboards
- Share dashboards or presentations for data collaboration in your user community
- Available on any device, on and offline

Benefits

- Enables intelligent decision making
- Intuitive dashboard
- Eliminates time and effort of manual report generation
- Fully integrated with AerData AMS and RMS solutions
- Self Service Analytics
